

## **Asbestos Hazard Emergency Response Act (AHERA)**

<https://www.epa.gov/asbestos/asbestos-and-school-buildings>

The intent of this notice is to provide our staff and community with a status of asbestos-related activities within Eastpointe Community Schools.

In 1989 Clayton Environmental Specialist, Inc. conducted inspections in each Eastpointe Community Schools building to determine the locations of asbestos-containing materials. The results of these inspections are incorporated into individual building management plans. Copies of the management's plans are located in the administration building and the individual school buildings. The management plans are available to review upon request.
